SUMMARY

Results-driven Full-Stack Software Developer with 1.5+ years of experience building scalable, AI-powered web and mobile applications. Proven success delivering production-grade features across Next.js, Android (Kotlin), and LLM-integrated systems. Passionate about designing modular frontends, optimizing backend communication, and shipping impactful solutions that improve user engagement and business outcomes.

EDUCATION

Vellore Institute of Technology (VIT University)
B.Tech in Computer Science and Engineering

CGPA: 7.9

TECHNICAL SKILLS

Languages: **Java**, **Python**, **JavaScript**, **Kotlin**, **SQL**, **PHP**

Frameworks & Libraries: **Next.js**, **React.js**, **Node.js**, **Flask**, **Laravel**, **Vue.js**, **Bootstrap**

Databases: **MongoDB**, **MySQL**

Development Tools: **Cursor**, **Android Studio**, **Git**, **VS Code**, **Postman**, **DS & Algo**, **OOPs concept**

EXPERIENCE

InMobi

Bengaluru, India

Full Stack Developer

(Jul 2025 – Present)

a global AdTech leader empowering brands with intelligent, data-driven advertising solutions across web, app, and connected devices.

- Frontend development for an Omnichannel Ad Publishing Platform using **Next.js**, **TypeScript**, and **Tailwind CSS**, enhancing ad campaign management efficiency.
- Designed and developed a reusable **Datatable component** with advanced server side sorting, pagination, and dynamic data binding — now integrated across multiple modules, boosting development velocity by **40%**.
- Built the landing and business pages, and **optimized** rendering performance for large asset files.
- Contributed to **frontend architecture and design** decisions, ensuring scalability, clean state management, and seamless integration with backend services.

Stellantis

Bengaluru, India

Software Developer

(Feb 2024 – Jul 2025)

An automotive manufacturing company that specializes in designing and producing vehicles.

- Enhanced in-car and remote voice interaction by developing **Alexa Skills** for 14 iconic automotive brands (**Jeep**, **Maserati**, **Alfa Romeo**, etc.), enabling seamless voice-controlled vehicle operations for over **5 million** users.
- Optimized multimodal UX by developing **responsive user interfaces for Echo Show devices**, boosting user engagement by **27%**.
- Developed an AI-powered voice assistant integrating LLMs (**GPT-4o**, **Gemini**, **DeepSeek**, **Realtime AI**) to enable hands-free operations with a 14-feature suite to enhance user experience now live in Citroen Basalt X. The subscription model is projected to generate at least **\$786 million** in revenue, driving significant business growth.
- Enhanced software efficiency and maintainability by refactoring and optimizing code for scalability, reusability, and **MVVM** compliance, significantly reducing technical debt. This improvement streamlined development, **saving 20 man-hours per sprint** through reusable code, and accelerating future iterations.
- Strengthened engineering teams by **conducting technical interviews** for tech lead roles, ensuring high-caliber hires for critical projects.

ITR Consulting

Illinois, US

Software Developer Intern

(Jul 2023 – Jan 2024)

A consulting firm specializing in IT solutions and software development.

- Engineered a high-traffic web application serving 2000+ daily users with a **Laravel + Vue.js** stack.
- Enhanced cross-platform UI responsiveness and implemented **MVC** architecture for scalable backend logic and **REST APIs**.

PROJECTS

MERN Stack Job Portal with AI-Driven Task Screening (<https://github.com/SatanSanta17/pickMe>)

- Built a full-stack job portal using **MongoDB**, **Express.js**, **React.js**, and **Node.js**.
- Integrated **Google LLM** models to power AI-driven task generation, significantly reducing bias and employer workload. This **automation** transformed a process that traditionally took **tens of hours** into a **matter of seconds**, enhancing efficiency.
- With accurate **prompt engineering** techniques, I generated several relevant tasks based on job descriptions.
- Developed and tested **RESTful APIs** for various use cases and integrated **MongoDB(NoSQL)** database due to its ease of integration and community support.
